 This PAM represents current planning for SAP BusinessObjects Planning and Consolidation Version 10.0 for Microsoft and can be subject to further changes without further notice

This document is subject to change and may be changed by SAP at any time without notice. The document is not intended to be binding upon SAP to any particular course of business, product strategy and/or development
BPC MS dates for 7.5 and 10 are the same as they are currently tied to end of mainstream support SQL Server 2008 maintenance dates. We are planning to support SQL Server 2012 with BPC MS V10 at which point we can raise the dates for BPC MS 10. Microsoft has not officially released support for SQL Server 2012. Plans include a BPC MS product version in mainstream support for the life of SQL Server 2012.

Draw can import graphics from many common formats and save them in over 20 formats, including PNG, HTML, PDF, and Flash. Zoom slider, or click on the + and - signs to change the view magnification of your document. Impress provides all the common multimedia presentation tools, such as special effects, animation, and drawing tools. Windows or Linux Mac equivalent Effect menu selection Access setup options Right-click depending on computer setup Open a context menu Ctrl (Control) # (Command) Used with other keys F5 Shift+#+F5 Open the Navigator F11 #+T Open the Styles and Formatting window What is LibreOffice? When opening files stored in a remote server, you may be asked to enter your user name and password to log in the Save As command above, select the option in the Save As dialog or Save dialog. 2) Click and the dialog opens (Figure 10). 3) In File Encryption Password, enter a password to open the document, click. 5) In File Sharing Password as confirmation. 4) To restrict who can edit the document, click and the dialog closes. See Chapter 14, Customizing LibreOffice for more information on installing extensions and add-ons. Toolbar icons with a small triangle to the right will display sub-menus, tool palettes, and alternative methods of selecting items, depending on the icon. Contributors are listed below. LibreOffice 5.2 requires one of the following operating systems: •Microsoft Windows XP SP3, Vista, Windows Server 2008, Windows Server 2012, or Windows Server spreadsheet is created. While it is most commonly used to create formulas in other documents, such as Writer and Impress files, Math can also work as a standalone tool. Common features include the Menu bar, standard toolbar, and formatting toolbar at the top of the window and the status bar at the bottom. Impress is compatible with Microsoft PowerPoint file format and can also save your work in numerous graphics formats, including Macromedia Flash (SWF). Draw is a vector drawing tool that can produce everything from simple diagrams or flowcharts to 3D artwork. See the relevant chapters in this guide about Writer, Calc, Draw, and Impress for descriptions of those details. The New icon changes depending on which component of LibreOffice is open. •If a document is already open in LibreOffice, click on the small triangle to the right of the icon on the Standard toolbar and select the type of document is already open in LibreOffice. By default, toolbars will dock at the top of the workspace. Figure 9: Example of LibreOffice Save As dialog To save a document, or change the file in a different location on your computer: •Use the keyboard shortcut Ctrl+Shift+S. •Go to on the Menu bar. When the dialog (Figure 9) or dialog opens, enter the file name, change the file type (if applicable), navigate to a new location (if applicable), and click. On computers operating Mac OS X, only a menu entry for LibreOffice is added to the Applications menu. See "Choosing Open and Save As dialogs" on page 20 for more information. Versions of LibreOffice for Windows, Linux, and Mac OS X can be downloaded free from . LibreOffice includes the following components. Figure 4: Toolbar handles You can also dock a floating toolbar by holding down the Ctrl key and double-clicking in the title bar of the toolbar. A panel is like a combination of a toolbar and a dialog. On computers operating a Linux or Windows operating system, the default installation of LibreOffice does not set the Quickstarter to load automatically. It is integrated with the advanced graphics capabilities of LibreOffice Draw and Math components. A dialog asking for the user name and the LibreOffice Start Center opens. You can also open files stored in remote servers running Content Management Interoperability Services (CMIS). LibreOffice runs on several hardware architectures and under multiple operating systems, such as Microsoft Windows, Mac OS X and Linux. •Extensive language support. Floating toolbars LibreOffice includes several additional toolbars, whose default setting appear as floating toolbars in response to the current position of the cursor or selection. Closing LibreOffice To close LibreOffice completely, go to on the Menu bar in Windows and Linux operating systems. Go to and select or deselect the option. Click on the same button to show the Sidebar again. Here are some of the advantages of LibreOffice over other office suites: •No licensing fees. The three icons in the folder hierarchy. LibreOffice provides a single-toolbar alternative to the default double-toolbar setup. A Mac operating system does not have this function; instead, you need to use to . To undock the Sidebar and make it floating, and to dock a floating Sidebar, use the drop-down list at the top of the tab bar (see Figure 8). To access the customization options for a toolbar, right-click in an empty space between the icons on a toolbar to open a context menu as follows: •To show or hide icons defined for the selected toolbar, click. This opens the Set Password dialog where you can enter a new password. The second toolbar at the top, in a default LibreOffice installation, is the Formatting bar. The Edit File icon becomes active on the Standard toolbar. The main pane displays the files in the remote folder. Some of these additional toolbars are context sensitive and will automatically appear depending on the position of the cursor. But undoing each change or remembering where the changes took place can be a difficult task. A confirmation dialog will warn you that you will discard your last changes. •GNU/Linux Kernel version 2.6.18, glibc2 v2.5 or higher, and gtk v2.10.4 or higher Administrator rights are needed for the installation process. It provides information about the document and convenient ways to change some features quickly. You can distribute, copy, and modify the software as much as you wish, in accordance with the LibreOffice Open Source licenses. •Cross-platform. To repeat the last command applied to your document, use the shortcut Ctrl+Shift+Y. LibreOffice 5.2 supports many document servers that use well known network protocols such as FTP, WebDay, Windows share, and SSH. You can scroll up or down in the Start Center to locate a recently opened document. When using the Open dialog, navigate to the folder you want, and then click on the gray button on the left. Tool palettes can be made into a floating toolbar. An example of a LibreOffice dialog is shown in Figure 9 on page 17. You can save formulas in the standard Mathematical Markup Language (MathML) format for inclusion in web pages and other documents not created by LibreOffice. This field is blank if the program is in Insert mode. Move the cursor over a higher level folder and release the mouse button to navigate to that folder . Create New Folder - creates a new sub-folder in the folder that is displayed in the dialog. Use the field to specify the type of file to be opened or the format of the file to be saved. However, when the computer is restarted, Quickstarter will be loaded again. When a context menu opens, the functions or options available will depend on the object that has been selected. For example, you can work on a document in the office during the day and edit it at home for last-minute changes. Although LibreOffice will work without Java support, some features will not be available. LibreOffice will work without Java support, some features will not be available. LibreOffice will work without Java support, some features will not be available. Menu bar and select the type of document from the context menu. •Use the keyboard shortcut Ctrl+N to create a new document. Digital signature If the document has been digitally signed, an icon shows here. It also supports popular services like Google Drive and Microsoft OneNote, as well as commercial and open source servers that implement the OASIS CMIS standard. You can also add icons and create new toolbars, as described in Chapter 14 Customizing LibreOffice. CMIS, like OpenDocument Format, is an OASIS standard. If the document has not been saved since the last change, a message box is displayed. Calc can also export spreadsheets in several formats, including for example Comma Separated Value (CSV), Adobe PDF and HTML formats. The LibreOffice Navigator lists objects contained within a document, collected into categories. A tab bar on the right side of the sidebar allows you to switch between different decks. Depending on the type of file service you choose in the listbox, different parameters are necessary to fully qualify the connection to the remote server (Figure 11). This can save several repetitive menu navigation clicks or keyboard shortcuts, especially when the command is taken from a secondary menu. For example, if Calc is open and active, a new spreadsheet is created. •Use on the Menu bar and select the type of document from the context menu. •If a document is already open in LibreOffice, click the icon on the Standard toolbar and a new document of the same type is created in a new window. Base also provides support for a subset of ANSI-92 SQL. Selection modes. Automatic saving, like manual saving, overwrites the last saved state of the file. For more detail, see the Sidebar explanation in the relevant LibreOffice component's user guide. Jean Hollis Weber Peter Schofield Olivier Hallot Hazel Russman Martin Saffron Ron Faile Jr. Jeremy Cartwright John A Smith Dave Barton Please direct any comments or suggestions about this document to the Documentation Team's mailing list: documentation@global.libreoffice.org Note: Everything you send to a mailing list, including your email address and any other personal information that is currently stored in the file system is loaded. Click on this icon to open the file for editing. The Menu bar is located across the top of the LibreOffice window, just below the title bar. Swisher Jean Hollis Weber Linda Worthington Michele Zarri Published 15 February 2017. See "Quickstarter" on page 8 for more information. If all documents are closed without closing LibreOffice, then the Start Center will be displayed. In a Mac operating system go to on the Menu bar. You can insert graphics and objects from other components into Writer document. Unsaved changes to the document have not been saved. As with Undo, click on the triangle to the arrow to get a list of the changes that can be reapplied. The dialog that opens when using the command depends on the options that have been set in LibreOffice are well integrated with one another. -All the components share a common spelling checker and other tools, which are used consistently across the suite. For example, the drawing tools available in Writer are also found in Calc, with similar but enhanced versions in Impress and Draw. -You do not need to know which application was used to create a particular file. Extensions and add-ons are available to enhance LibreOffice. Base incorporates two relational database engines, HSQLDB and PostgreSQL. From the same list you can choose which items to include in the Sidebar. In the Undo section increase or decrease the . LibreOffice also provides support for both Complex Text Layout (CTL) and Right to Left (RTL) layout languages (such as Urdu, Hebrew, and Arabic). •Consistent user interface. The table below gives some common substitutions for the instructions in this chapter. There are no hidden charges now or in the future. •Open source. Its native file format for publishing and accepting documents. Its Smart Connectors feature allows you to define your own connection points. The default names may not correspond to the actual position of the object in the document. •Each Navigator in the individual LibreOffice components has a different range of functions. You can use Draw to create drawings for use in any of the LibreOffice components, and you can create your own clip art and then add it to the Gallery. On computers with Windows or Linux operating systems, a menu entry for LibreOffice and each LibreOffice component appears in the system menu of your computer. Not saving your document could result in the loss of recently made changes, or worse still, the entire file. To redo a change use the keyboard shortcut Ctrl+Y, or click the icon, or go to on the Menu bar. You can also use a keyboard shortcut as follows: •In Windows and Linux - Ctrl+Q •In Mac OS X - Command #+Q If any documents have not been saved since the last change, a message box is displayed. They are opened by right-clicking on a paragraph, graphic, or other object. To close a toolbar go to on the Menu bar and deselect the toolbar, or right-click in an empty space between the icons on a toolbar and select from the context menu. Many features that are available as extra cost add-ins in other office suites (like PDF export) are free with LibreOffice. The appropriate component of LibreOffice will start and the document will be loaded. You can reposition the toolbar to a different docked position. The main window is similar for each component of LibreOffice, although some details vary. See "Moving toolbars" on page 11. •Click to close the selected toolbar into its docked position. saved password-protected. Select a file and then right click to open a context menu. It includes over 300 functions for financial, statistical, and mathematical operations, among others. A context menu can be the easiest way to reach a function, especially if you are not sure where the function is located in the menus or toolbars. The contributors to those editions are: Thomas Astleitner Richard Barnes Agnes Belzunce Daniel Carrera Laurent Duperval Richard Holt Ian Laurenson Alan Madden Carol Roberts Iain Roberts Gary Schnabl Janet M. This lets you quickly navigate to the target folder or remote server. Figure 1: LibreOffice Start Center If you do not have Microsoft Office installed on your computer, or if Microsoft Office is installed but you have associated Microsoft Office is installed bu associate the file types and Microsoft Office is installed on your computer, then when you double-click on a Microsoft Office on the various supported operating systems is given here: In a default LibreOffice installation, the top docked toolbar, just under the Menu bar, is called the Standard toolbar. When LibreOffice is running but no document of that type, or click the icon to start a new document using a template. The Places pane in the dialog displays the shortcuts to folders and file services you bookmarked. For example, the buttons for making text bold or italic exist in both the Formatting toolbar and the Properties panel. Calc generates 2D and 3D charts, which can be integrated into other LibreOffice documents. •File - contains commands that apply to the entire document such as Open, Save, and Export as PDF. •Edit - contains commands for editing the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Header, Footer, and Image. •Format - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for controlling the document such as Undo, Find & Replace, Cut, Copy, and Paste. •View - contains commands for contains commands commands for contains commands for contains commands commands fo for formatting the layout of your document. • Styles - contains commands for guickly applying common styles; and for accessing the Styles and Formatting section of the Sidebar. • Table - contains commands to insert and edit a table in a text document. • Tools - contains functions such as Spelling and Grammar, AutoCorrect, Customize, and Options. •Window - contains commands for the display window. •Help - contains links to the LibreOffice has two types of toolbars: docked (fixed in place) and floating. You may distribute it and/or modify it under the terms of either the GNU General Public License (, version 3 or later, or the Creative Commons Attribution License (, version 4.0 or later. All the components have a similar "look and feel," making them easy to use and master. •Integration. Right-click on the percentage figure to open a list of magnification values from which to choose. All trademarks within this guide belong to their legitimate owners. You can customize toolbars in several ways, including choosing which icons are visible and locking the position of a docked toolbar. Storing files on a remote server also backs up documents from computer loss or hard disk failure. When using CMIS servers, the service will ask you for the necessary credentials for file access. When LibreOffice is installed on computers running Windows or Linux, a Quickstarter feature may also be installed. To display or hide toolbars, go to on the Menu bar, then click on the name of a toolbar from the drop-down list. To provide additional opportunities such as working with cloud or remote servers, and searching by versions, switch to using LibreOffice dialogs. To activate it, enable and disable and . Acknowledgments This chapter is adapted and updated from previous editions of this chapter. To start a LibreOffice component directly by using Quickstarter: 1) Right-click the icon in the system tray to open a pop-up menu (Figure 2). 2) Select the LibreOffice component you want to open to create a new document, or select to open the Template Manager, or select to open an existing document. Figure 2: Quickstarter menu in Windows operating system, right-click on the icon in the system tray and select in the pop-up menu. If you use your operating system dialogs for saving and opening files, go to and check the option. Computers with a Mac operating system do not have a Quickstarter. The LibreOffice user interface, including spelling, hyphenation, and thesaurus dictionaries, is available in over 100 languages and dialects. To choose a different page style or slide design, right-click on this field and select from the list that pops up. Changing the password When a document is password-protected, you can change an option, it affects all components. For example, if you choose as the file type, you will only see documents Writer can open (including .odt, .doc, .txt); if you choose, you will see .ods, .xls, and other files that Calc opens. An example of the Writer status bar is shown in Figure 6. Double-click on this field to open the Navigator. View layout Select between Single-page view, Multiple-page view, and Book view to change how your document is displayed. Several extensions are installed with the program and you can get others from the official extensions repository, . LibreOffice uses OpenDocument, an XML (eXtensible Markup Language) file format developed as an industry standard by OASIS (Organization for the Advancement of Structured Information Standards). Proceed entering your credentials. For example, when the cursor is on a graphic, the Formatting text, the tools are for formatting text. It can also use dBASE, Microsoft Access, MySOL, or Oracle, or any ODBC compliant or IDBC compliant database The toolbar can be docked in a new position at the top, sides or bottom of the main window, or left as a floating toolbar, select from the Menu bar.

3) Release the mouse button. To move a floating toolbar, select from the Menu bar. Select or deselect icons to hide or show them on the toolbar. Figure 5: Selection of visible toolbar icons •Click to dock the selected floating toolbar. You can choose whether to use the LibreOffice Open/Save dialogs or the ones provided by your computer's operating system. It is similar in Writer, Calc, Impress, and Draw, but each LibreOffice component includes some component. located at the bottom of the workspace. Go to on the Menu bar and click the button. You can join the community and affect the course of the product you use. You cannot copy or paste files within the dialogs. For example, in Writer it shows Headings, Tables, Text frames, Comments, Graphics, Bookmarks, and other items, as shown in Figure 13. In a default installation of LibreOffice, the Navigator is part of the Sidebar. Choose whether to save or discard your changes. To enable a remote server connection, use one of these methods: •Click on the button in the Start Center •Select • Select Then click on the button (Figure 12) in the dialog to open the File Service dialog. In Impress and Draw it shows Slides, Pictures, and other items. To remove a folder from the Places pane, click its name and then click the button. You can also select to open an existing file or use a template. See "Moving toolbars" and "Floating toolbars" below for more information on moving and floating these toolbars created from tool palettes. To reload a document, go to on the menu bar. The Remote Files dialog (Figure 12) which then appears has many parts. Click the small triangle to the right of the icon to get a list of all the changes that can be undone. Figure 12: Remote Files dialog when connected to a server You can rename or delete files within the LibreOffice dialogs, just as you can in a file manager. Other uses of this field depend on the LibreOffice component. It contains the most-used commands. If you use your computer system's dialogs, you can move files only to and from mounted file systems on the local computer. In addition to its native OpenDocument formats, LibreOffice includes support for opening and saving files in many common formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats including Microsoft Office, HTML, XML, WordPerfect, Lotus 1-2-3, and PDF. •No vendor lock-in. Chapter 1 Introducing LibreOffice Document formats Introducing Libr users can also get two versions of LibreOffice from the App Store: LibreOffice from the App Store: LibreOffice from the App Store: Language of the text at the current cursor position. On the left is the folder structure of the user space in the server. An active toolbar shows a check-mark beside its name. LibreOffice component to open. These files can easily be unzipped and read by any text editor, and their framework is open and published. •You have a voice. Most of the icons and most menu options are disabled on the toolbars. Toolbars created from tool palettes are not listed in the View menu. Insert mode Shows the type of insert mode the program is in. Click and hold the mouse button on this icon to display a drop down a list of higher level folders. The line below the list box shows the path to access the folder. The option on the Open dialog opens the file for reading and printing only. If a document is already open in LibreOffice, the second document opens in a new window. It can create and edit forms, reports, queries, tables, views, and relations, so that managing a relational database is much the same as in other popular database applications. In the Open dialog, you can reduce the list of files by selecting their usage and access. LibreOffice is free for anyone to use and distribute at no cost. Base provides many new features, such as the ability to analyze and edit relationships from a diagram view. Figure 6: Example status bar from Writer Page, sheet, or slide number and page count Shows the current page, sheet, or slide number and the total number of pages, sheet, or slide number and page count Shows the current page, sheet, or slide number and page count Shows the current page, sheet, or slide number and the total number and page count Shows the current page, sheet, or slide number and page count Shows the current page and page count Shows the current page and page count Shows the current page and pa on the title bar of the window, then LibreOffice will close completely. Panels are organized into decks. To set up automatic file saving iles on remote servers LibreOffice 5.2 can open and save files stored on remote servers. For example, when the cursor is in a table, a Table toolbar appears, and when the cursor is in a numbered or bullet list, the Bullets and Numbering toolbar appears. It is context-sensitive; that is, it shows the tools relevant to the cursor or the object selected. If only one document is open and you want to close that document, go to on the Menu bar or click on the X on the right or left end of the Menu bar. When Quickstarter is activated, the necessary library files are loaded when the computer system is started, resulting in a shorter startup time for LibreOffice components. When you select one of the menus listed below, a sub-menu drops down to show commands. Click the or button to proceed. Object information Displays information relevant to the position of the cursor or the selected element of the document. After changes have been undone, you can redo changes. Figure 7: Properties, Styles and Formatting, Gallery, and Navigator decks. If the passwords do not match, you receive an error message. Figure 10: Set Password dialog LibreOffice uses a very strong encryption mechanism that makes it almost impossible to recover the contents of a document level or even at document level. •File compatibility. For a more detailed listing of requirements, see the LibreOffice website, . To edit the current page style or slide design, double-click on this field. Linux users will also find LibreOffice included in many of the latest Linux distributions; Ubuntu is just one example. Figure 3 shows an example of a tool palette from the Drawing toolbar made into a floating toolbar. To add a place, navigate to the folder where your document is located and click the button. 1) Move the mouse cursor over the toolbar and highlighted in Figure 4. 2) Hold down the left mouse button and drag the toolbar to the new location. Writer is a feature-rich tool for creating letters, books, reports, newsletters, brochures, and other documents. You can use it to create complex equations that include symbols or characters not available in standard font sets. For example, you can freely mix working in the main edit window to enter text and use the Properties panel in the sidebar to change text attributes. You can reposition the toolbars to different docked positions. The Scenario Manager provides "what if" analysis. You may want to discard all the changes made in an editing session after the last document save. It contains one or more panels, based on the current document context. Each time the Ins key is pressed, or this field is clicked, the mode toggles between Insert and Overwrite. The upper list box contains the list of remote servers you have previously defined. For more information on opening files, see "Opening existing documents" on page 16. By default, a toolbar will dock at the top of the workspace. Slideshows can be further enhanced using Fontwork special effects text, as well as sound and video clips. The dialog will dim until the connection is established with the server. It is consistent across the LibreOffice open and Save As dialogs or the ones provided by your operating system. In Calc it shows Sheets, Range Names, Database Ranges, Graphics, Drawing Objects, and other items. Tool bars and Sidebar panels share many functions. The X may be located on either the right or left end of the title bar. To open the Navigator provides several convenient ways to move around a document and find items in it: •When a category is showing the list of objects in it, double-click on an object to jump directly to that object's location in the document. •Objects are much easier to find if you have given them recognizable names when creating them, instead of keeping the default names such as Sheet1, Table1, or Table 2. Based on LibreOffice 5.2. Some keystrokes and menu items are different on a Mac from those used in Windows and Linux. Writer can export files to HTML, XML, Adobe Portable Document Format (PDF), and several versions of Microsoft Word files. To prevent the Quickstarter from loading during system startup, do one of the following: •Right-click on the icon and deselect on Linux. If Quickstarter has been disabled, you can reactivate it by using the instructions given in "Activating Quickstarter" above. Base provides tools for day-to-day database work within a simple interface. Some LibreOffice features (wizards and the HSQLDB database engine) require that the Java Runtime Environment (JRE) is installed on your computer. These functions are further explained in the user guide for each LibreOffice component. Figure 13: Navigator in Writer To undo the most recent change in a document, use the keyboard shortcut Ctrl+Z, or click the icon on the Standard toolbar, or go to on the Menu bar. The name of the folder will show in the Places pane. You can click the icon on the Standard toolbar, or go to on the Menu bar. The name of the folder will show in the Places pane. You can click the icon on the Standard toolbar, or go to on the Menu bar. The name of the folder will show in the Places pane. of the advanced analysis, charting, and decision making features expected from a high-end spreadsheet. Figure 11: Remote server configuration Once the connection is defined, click to connect. For example, you can open a Draw file from Writer. •Granularity. For a more detailed list, see the application Help. You can also open an existing document that is in a format that LibreOffice recognizes by double-clicking on the file icon on the desktop or in a file manager such as Windows Explorer. You can select multiple changes and undo them at the same time. It also connects to your email client. The document returns to the state where it was last saved. You can also open and work with Microsoft Excel workbooks and save them in Excel format. The Sidebar (Figure 7) is located on the right side of the edit views of Writer, Calc, Impress, and Draw. Docked toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float, and floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars can be moved to different locations or made to float floating toolbars. computer. Visible icons on a toolbar are indicated by an outline around the icon (Figure 5) or by a check mark beside the icon, depending on your operating system. To access remote servers, you must use LibreOffice Component is open and active. If more than one document is open and you want to close one of them, go to on the Menu bar or click on the X on the title bar of that document in LibreOffice in several ways. To activate it: 1) Open LibreOffice. 2) Go to on the Menu bar and select Load LibreOffice during system start-up (if using Windows) or select Enable systray Quickstarter (if using Linux). 3) Close and restart LibreOffice to have Quickstarter appear. After Quickstarter has been activated, an icon is installed into the system tray at the bottom of the display. On reloading your document, the File dialog will not open, because the file is already selected. You can also open an existing document in one of the following ways: •When no document is open, click or in the Start Center to reach the Open dialog. •Go to or on the Menu bar the reach the Open dialog. •Use the keyboard shortcut Ctrl+O to reach the Open dialog. and select from a list of available documents from the Open dialog. •Click the small triangle to the right of the icon and select from a list of recently opened documents. from the Start Center. Figure 3: Example of tearing off a tool palette Docked toolbars can be undocked and moved to a new docked position or left as a floating toolbar. Be aware that asking LibreOffice to remember more changes from the last save operation, you can reload your document. In some cases it is convenient to reduce the number of toolbars displayed and get more space for the document. To restrict who can open and read a document, or open and edit the document, use password protection. Clicking on the LibreOffice Menu entry, desktop icon, or tile opens the LibreOffice Menu entry can save files automatically as part of the feature. See "Moving toolbars" on page 11. •Click to dock all floating toolbars. Page style or slide design. Opening an existing document before starting LibreOffice by double-clicking the filename of an ODF document on the desktop, or in a file manager such as Windows Explorer or the Mac's Finder. You can save document, its current filename and location. • - use if you are keeping the document, its current filename and location. • - use if you want to create a new document, or change the filename and/or file format, or save the file in a different location on your computer. • - use if you want to save a document if you are keeping the document if you are keeping the document on your current session. To save a document and keep it open files open in your current session. keyboard shortcut Ctrl+S. •Go to , , , or on the Menu bar. •Click the on the Standard toolbar. Using the Save command will overwrite the last saved version of the file. This book uses the LibreOffice dialogs in illustrations. LibreOffice dialogs in illustrations. Office. Quickstarter is then available at all times, whether LibreOffice is open or not. Click the marker (+ or triangle) by any of the category. You can dock these toolbars to the top or bottom of the main window, or reposition them on your computer display (see "Moving toolbars" above). On Mac OS X, the document closes and only the Menu bar remains at the top of the screen

Windows 10 WILL upgrade from your old Windows 8.1 BUT I found the machine slow and well, not quite right, so wiped it out ... Download 32 bit Windows 10. 16/01/2018 · The following is a very popular method among Windows 10 aficionados to install third-party themes onto their Windows 10 computers. This method will allow you to control the look of your File Explorer, a major component of the Windows 10 UI, and other applicable programs like the Task Manager. 2.4.1 DevianArt Themes 22/01/2020 · 2. After getting them to add your IMEI to the unlock list, go to the system settings --> WiFi & internet --> SIM & network section. There will be an option called "Network Unlock" at the very bottom under the 'Advanced' section. Click that and then go through the prompts. You want to choose "Permanent Unlock". Select Type "Linux" and Version "Linux 2.6 / 3.x / 4.x (64-bit)" Select "Use an existing virtual hard disk file", select the unzipped VDI file from above; Edit the "Settings" of the VM and go "System" then "Motherboard" and select "Enable EFI" CURRENT VERSION; 27 Jan 2020 Nethack 3.6.3 released; 21 Dec 2019 Updated Windows binaries released due to crash on launch if tiles in the select to select the unzipped VDI file from above; Edit the "Settings" of the VM and go "System" then "Motherboard" and select "Enable EFI" I got one way to get it to work on Windows 10 64 bit newest version. 1. Download the original ISO 2. Extract the ISO's in the zip 3. In the search box in windows type "Powershell" 4. In the shell type Mount-DiskImage -ImagePath or upsilon of Windows 10 setup will automatically windows 10 setup automatically windows 10 setup automatically windows 10 setup will automatically installed Windows 10 setup will automatically install Windows 1
