The SimCity 4 Extra Tricks Pink Plugin Overview: The SimCity 4 Extra Cheats plug-in was originally a SimCity 4 internal file, used by Maxis during the development phase to test the game before its Release to the public. However, in the years following the release of the game, Buggius, a resident of prominent modder here in Simtropolis, contacted Maxis and received permission to release this file to the public. The extra trick plugin adds many additional features to the game, such as the ability to tilt any building or lot at will, the ability to easily set how much money is in the treasure of your city and even the ability to add snow to your land, as Well like many other additional features. However, it should be kept in mind that this file was originally intended to be released to the public. It was built only for test purposes. As a result, it should be treated with caution. The use of this file incorrectly can lead to game instability and even crashes. No data warranty or user guidelines can be provided this file, if you choose to use it, you need to do it at your own risk. How to use this file in the game: After installing (see below), enter a city and press the [CTRL] + [X] key combination to open the trick. Right-click anywhere inside the scam, you will see a drop-down list. Now you can select a cheat from the list by clicking on it. After selecting a trick, press Enter to confirm the selection. Below is a list of all known cheat codes enabled by this file (as well as standard game tricks) and a description of their effects. How the effects of some tricks are unknown, not all tricks have available descriptions. Update: To fill out some Maxis unknowns gave me the details on some of the missing descriptions. Barstuck - Once invoked, all your small commercial services (low density lots 1x3) start turning into bars, and then remain in that way forever. WatchMove - enables the animation step. After enabled, Control-SHIFT-ALT-F11 and Control-Shift-Alt-P implement animation animation and pause respectively. GP - Enable or deactivate the game pause when you switch to another application. This is useful for if you go away from the game and you want to sleep while it is in the background. Flora (upon | OFF) | (Store up | off) | (Propagation on | off) | (Blast ) controls the flora simulation parameters. By default, during the simulation of the city flora is turned on, the storage is turned off and the prophying is off.
