Various types of files are used in making music with Live, from those containing MIDI (see 5.3) and audio (see 5.2), to more program-specific files such as Live Clips (see 5.4) and Live Sets (see 5.5). This chapter will explain everything you need to know about working with each of these file types in Live. However, we should first take a look at Live¢ÃÂÂs browser, through which most files arrive in the program. 5.1 Working with the Browser is the place where you interact with your library of sounds that are installed with the program, any additional sounds you¢ÃÂÂve installed via Ableton Packs, presets and samples you¢ÃÂÂve saved, your Ableton and third-party devices, and any folder on your hard drive that contains samples, tracks, etc. The Browser display is divided into left and right sections, drag the divider line horizontally. 5.1.1 Understanding the Browser¢ÃÂÂS Hierarchy Working in the browser involves choosing one of the labels from the Collections, Categories or Places sections in the sidebar, and then selecting from the items that appear in the content pane. These labels (or ¢ÃÂÂtags¢ÃÂÂ) enable you to quickly organize and access particular browser items (for example, your favorite or most-used items). You can assign Collections labels via a selected item¢ÃÂÂs right-click(Win) / CTRL-click(Win) / CTRL-clic Collections labels can also be assigned to multiple browser items within a selection. Additionally, it is possible to assign a color to a battery sound, a midi effect and a plug-in. By clicking on a label of collections in the sidebar shows all the elements tagged with that color. The folders that appear on the labels of the collections can be explained to show their context menu of the right button (Win) / Ctrl (Mac) or by pressing Ctrl-R (Win) / CMD-R (Mac). You can choose which labels are visible in the browser, by clicking on the Edit button next to the heading of the collections and checking the show/hide label option next to each label. Change collections shown and hidden in the browser. To exit the modification modality, press the "Done" button. The button made in the browser. Note that when an unqualified non-assigned color is assigned to an element of the browser, the label of the collections for that color will be automatically shown in the sidebar. However, visible color labels are not automatically hidden if all their assignments are removed. Browser articles and their colors assigned to each element. Note that although more colors can be assigned to an element, no more than three of these colors will be shown in the content box. Categories section to explore and discover all the tools and sounds you have installed. The categories section is organized as follows: sounds - all instruments racks (see chapter 20) and presets of instruments, organized by the type of sound they emit (rather than their devices.) Tambini - All your drum Cié includes complete battery kit, which are available as a battery rack, as well as single drums shots, which are delivered as Rack tools. Tools - All your instruments racks, as well as the live tools and their presets, organized for device (rather than by type of Eb yrrabbil resu ruoy evaos evaos taht selif .cte ,spilc evil ,selpmas ,steserp ecived dna skcar dezsilosrep ruoy ,sevoorg m yht smet smarced gnudulcni , 㢠yrarbil resu .NoitamrofThe Erom ROF)2.1.5 EES(Reswork eht of ScCap Gnillatsni dna gnidaolnwod ot refer .llatsni nac uoy taht skcap ladadad osrtdad srate swort shalts Raeppa olw Skcap yb Dellatsni Spilc Evil DNA, Stesserp .stnetnoc sâ€â€âkop Taht laver ot dedlofnu hcihw hcif hcifsây hcivs htnetnoc laut eht .kcap no-dda ro dedda Evâ€â€a¢uoy Redlof of hcus ,ecalp eat .tsil elngnis that ResWorb Eht FO Noitce esaht esu .Sevid dah ruoy no sredlof fo stnetnoc eht wohs slebal secalp eht .tsil elngnis that ResWorb Eht FO Noitce ¢uoy Retfa Srappa Noitces esaht esu .94.5.5 Ees(stes evidence ruoy fol â€â€TREE Sevoorg .Selpmas oidua war ruoy fo â€â€â Selpmas .spilc Evil Ruoy Fol â€â€â Spilc spilc 2.91 Ees (Sni-Gulp stupy oidua Ro/dna tsv ytrap-driht ruog-driht ac sni-gulp .sredlof tceffe in the tnemurtsni ,tceffe oidua otni dezinagro ,secived esoht htiw tliub era taht skcar y llew sa ,steserp dna scived)7 ROF XAM Xam .stesserp dna secived scived scived scived scived actived scived actived actived scived actived scived actived actived scived actived actived actived actived scived actived ac ã¢warâ€â£â The LLEW in ,skcar tceffe oidua ruoy fol â€â€â sceffe Oiidudua ,I'm disappointed with nehw .Noci edit eht sserp ,daolnwod a ednie ot .tniop retal ken seht emuser dna sdaolnwod educap nac uoy ,ot deen uoy dluohs . T Press the Install button to install a package. After pressing the Install button, Live will display a progress bar indicating the process status. Note that you can download a Pack, suspend, resume or cancel a download, or install a Pack by choosing the appropriate command in the context menu (Win) / CTRL-click(Mac). Sometimes you may need to know the size of a package before downloading and installing it. For example, you can have limited space on your hard drive. You can configure your browser to show the size of all packages that appear in the Updates and packages sections available. To do this, right-click (Win)/CTRL-click (Win)/CTRL the Size option in the context menu. Show or hide packages size in your browser. You can delete a Pack installed via the Quick Choice menu (Win) / CTRL-click (Mac). Note that the deleted packages available in your browser. To do this, press the Toggle Show Downloadable Packs in your library preferences. Show or hide downloadable packages in your browser. 5.1.3 User Folders Live browser allows, for example, to store large sample collections on one or more external units, and still use the browser to access their content - there is no need to keep them in a single centralized place. to work with their live folders, you must first add themThe browser, letting them fall directly into live by the Explorer (Windows)/Finder (Mac) or by pressing the Add Folder button in the browser's sidebar. After adding a user folder, the scanzionerã live, that "Teaches" the browser on its content. Subsequently, they appeared in the places of the sidebar. Note: the addition of a user folder to a new position, but simply makes it available in the places of the sidebar. Note: the addition of a user folder to a new position, but simply makes it available in the places of the sidebar. Note: the addition of a user folder to a new position, but simply makes it available in the places of the sidebar. Note: the addition of a user folder to a new position, but simply makes it available in the places of the sidebar. Note: the addition of a user folder to a new position, but simply makes it available in the places of the sidebar. Note: the addition of a user folder to a new position, but simply makes it available in the places of the sidebar. user folders if they have been moved. For example, if a user folder is contained on an external hard drive and the live is opened without the connected unit, the user folder appears in the browser however but will be gray. You can try to find it using the contextual command of the right button (Win) / Ctrl-Click (Mac) or tell it to live to "forget" this folder via the Thisf from Sidebar command. You can also use this command to remove the folders that are not missing, but that you simply don't want to work more. 5.1.4 The search for Live browser files is equipped with a search field that filters the content of the selected side label as you type. To search in all positions, press Ctrl-F (Win) / CMD-F (Mac). The browser search field. The results will include files that correspond to all research produces all the sounds of low acoustic "not all acoustic sounds of bass. For the search without mouse, we suggest the following sequence of shortcuts: CTRL-F (Win) / Cmd-f (Mac) to place a cursor in the search field; type your search terms; arrow key to jump to the search results; arrow keys and already to scroll i research field, showing all the contents of the selected side label. Live allows you to preview imported into the program. To enable the preview, activate the preview switch is not activated by pressing Shift-enter or the right arrow key. Click a file (or use the arrow keys on and already) to select it. Click on the tab washing area to blow the reproduction at that point. (Note that it is not possible to clean clips that have been saved with Warp off.) It is possible to preview tab. It is also possible to preview tab it is not possible to preview tab. When selected, you can hear a short audio of the preset, so you can get an idea of how it sounds before loading it. With the Raw enabled button, preview files at their original time and non -loop. With RAW disabled, Live try to preview the files in synchronization with the current set, so that you can best judge which samples work for you. Please note that cleaning is not possible when Raw is enabled. The preview volume can be adjusted using the mixer preview knob. The preview knob. The preview knob. The preview continues to play. To learn how to configure Live for Cueing, refer to the relative section (see 16.6) of the Mixing chapter. There are several ways to add clips to a live set: the files can be dragged and removed from the browser in traces of Session View or under the traces of Arrangement View creates a new track and place the new clip (S) lã¬. Throw a clip to create a new track. Live can play both uncompressed file formats (WAV, AIF and Sound Designer II for Mac) and compressed file formats (MP3, (MP3,)Ogg vorbis, og flac and flac). bit installment files (VBR): install QuickTime for decoding purposes if you do not have it already systemIt can be downloaded from the Apple*http://www.apple.com/quickTime/download website. Since Live plays the champions directly from the disc, you can work with a large number of (large) samples without running within the memory limits of the RAM. Please note, however, that it is possible to undergo the disc is almost full and/or (on Windows systems) highly fragmented. The rotation speed of the disc is almost full and/or (on Windows systems) highly fragmented is almost full and/or (on Windows systems) highly fragmented. The rotation speed of the disc is almost full and/or (on Windows systems) highly fragmented. The rotation speed of the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows systems) highly fragmented in the disc is almost full and/or (on Windows combine mono non -compressed or stereo sample and writes the result in a temporary and not compressed example file. This usually happens quickly enough to play the champion immediately, without waiting for the decoding process to finish. Note: When adding a long sample to a project, live could tell you that it cannot reproduce the sample before it is analyzed. Please consult the section on the analysis (see 5.2.2) for an explanation. 5.2.1 The decoding cache to save computational resources, Live maintains the decoded example files of compressed samples in the cache. The maintenance of the cache is normally not required, since Live automatically eliminates the older files to make room for those who are new. However, it is possible to impose limits on the size of the cache using the decoding cache section of the The cache does not grow much more than the maximum setting of the cache size and always leave the minimum free space on the hard drive. Pressing the cleaning button nearby delete all files not used by the current live set. live. VIDEO ECODER - This choice syou have here depend on the encoder to be used for video rendering. The choices you have here depend on the encoder to be used for video rendering always produce a video in addition to the audio made. VIDEO ECODER - This choice allows you to select the encoder to be used for video rendering always produce a video in addition to the audio made. selected coding. Note that the settings options will vary according to the encoder you have chosen. Some encoders have no user configurable options. In this case, the modification button will disable. Once you have made the selections and click on the export to start the rendering process, start audio rendering. After the completion of the audio rendering, the video will be made. Note that, depending on the encoder used, the video rendering can occur in more than one passage. Live shows a progress bar that indicates the state of the process. Unless you have specified a size or a special proportion of the window in the encoder settings, the video file made it goes exactly as it appeared durin the reproduction in real time live. The video file also contains the audio made. For more information on how to work with live videos, consult the on the video (see 24.18) or external tool (see 26.4) 26.4) to a hardware effects device or synthesizer, the rendering process is a bit different. In this case, rendering the master output happens in real time. If you render single tracks, all tracks that do access these devices will be rendered in real time. Live will automatically trace each track¢ÃÂÂs signal flow and detect if real-time rendering is necessary. You¢ÃÂÂll then be presented with several options when you start to render: Waiting for External Devices to Become Silent. Skip ¢Ã By default, Live will wait for ten seconds before starting a real-time render. This should allow any sound from external devices to fade out, but if you need more time (for example, if you¢ÃÂÂre waiting for a long reverb tail), you can increase the wait time by typing a new number in the number box. On the other hand, if you¢ÃÂÂre sure that your external devices aren¢ÃÂÂt making any sound, you can speed the process along by pressing ¢ÃÂÂSkip,¢Ã which will start the render immediately. After the render has begun, the dialog changes to show a recording progress bar: Real-Time Rendering in Progress. Auto-Restart on drop-outs (\$\tilde{A}\hat{A}\$ Rendering in real-time requires somewhat more CPU power than non-real-time rendering, and in some cases drop-outs (\$\tilde{S}\hat{A}\$ Rendering in real-time requires somewhat more CPU power than non-real-time rendering, and in some cases drop-outs (\$\tilde{S}\hat{A}\$ Rendering in real-time requires somewhat more CPU power than non-real-time rendering in real-time rendering in realdetects when drop-outs happen, and rendering will start again from the beginning if the Auto-Restart option is enabled. Restart ¢Â manually restarts the rendering process. Cancel ¢Â stops the rendering process and deletes the partially restarts the rendering process. dialog box. If you find that dropouts and restarts keep happening, you should close other running applications to allow more processing power for rendering. You can then type a new name for the clip or confirm the one suggested by With Enter. A live clip in the browser. Live clips are a great way to preserve your ideas for subsequent use or development, as they save not only the original clip, including all its clip and envelope settings, but also the original trace devices or drag it into the space in the session or disposal view containing tracks. Note that live clips that are imported into tracks already containing devices or clips will appear with their clip settings but not their devices. For example, you could leave a clip live on an existing track that drives a low tool, rather than creating a new track. The clip belonging to any live set already on disk are also live clips. Please consult the section on the merger of the sets (see 5.5.2) for more information on this topic. Note that the storage of the predefined clip in the .SD file notes the sample analysis file is different from saving a live clip. The predefined clip in the storage of the predefined clip in the sample analysis file is different from saving a live clip. The predefined clip in the storage of the predefined clip in the sample analysis file is different from saving a live clip. memorized on disc as separate musical ideas. For example, it is possible to create a series of variants from the same audio clip using several warp settings, wrapping and effect and store them all as separate live clip. In the browser, you could then order independently and preview these clips, even if they all refer to the same sample of origin. 5.5 Live Set the type of document on which you create and work in live is called Live Set. Think about this as a single ã ¢ âvelop "Song. â € the sets must be Within projects, so that the live can be traced and managed all the various components of the set in live: live clip, presets of devices, any samples used, etc. 5.5.1 Creation, opening and saving set Use the new Live set command of the file file oppurg id eccart el eranicsart elibissop ertloni A .teS eviL dednapxE nu ni nocI ivitisopsiD I .resworb len tes lad ivitisopsid nu ,oipmese da(ovitisopsid led anetac al olos aredised is eS .otageipsid tes led onretni'lla alletrac emoc ehcna ilibinopsid onos tes ortsov li noc etavlas etats onos ehc)31 olotipac idev(erutalanacs ilautnevE .enoizes atseug id oizini'lla ottircsed emoc elraicsal e eccart elognis el eranicsart elibissop "A aro .itunetnoc ious i eralevir rep teS nu eraqeipsid elibissop in ad inarb ilognis eratropmi ecsireferp is eS .evil tes id enoizatropmi'l rep aiccog id aerA .evil tes id enoizatropmi'l rep aiccog id aer isaislaug us olaicsalir e ,etnerroc tes len resworb lad tes li anicsart ,ortla nu ni teS eviL nu ad)onrotir id eccart el ettut eregnuigga reP .izzep o inoisrev esrevid ad oroval li onanibmoc odnaug ilitu erinev onossop ehc ,tes i erinu elicaf edner eviL enoisuf id teS 2.5.5 .yrotcerid alled enoizisop avoun o/e emon ovoun nu noc teS eviL elautta'lled aipoc anu eraerc rep aipoc anu eraerc rep aipoc anu avlaS odnamoc li o "vrotcerid alled enoizisop asrevid anu ni o/e osrevid emon nu ottos teS eviL elautta'l eravlas rep sA teS eviL elautta'l eravlas id etnesnoc eliF unem led teS eviL avlaS odnamoc li erazzilitu elibissop Ã. inoizatsopmi el e pilc el ettut esulcni "Ã ol emoc etnemattase teS eviL elautta'l eravlas id etnesnoc eliF unem led teS eviL avlaS odnamoc li olrirpa rep eviL tes nu us oivnI eremerp o cilc oippod eraf elibissop "Ã, resworb len enterso otnemiglovs otnemigl resworb lad oppurg id eccart el eraiccates e)3.61 you can also open the tracks inside the sets to access the individual live clips. This means that any Live Set can serve as a pool of sounds for any other, suggesting creative reuse and crossover. 5.5.3 Export session viewing clips as a new live set by dragging them to the browser. To export a selection of session viewing clips as a new live set by dragging them to the browser. To export a selection of session viewing clips as a new live set by dragging them to the browser. viewing clip. Then, simply drag and drop clips into the current project or any user folder, where you can confirm the suggested name of Live or type in one of your own. 5.5.4 Set of templates Use the Save File menu Live Set as default default... command to save the current live setting as the default model. Live will use these settings as an initial status, default for the new Live Sets. You can use this to pre-configure: The multichannel input/output configuration. Preset devices, such as EQ and Compressors, in each track. Computer key mapping (see 29.2.5). Mapping MIDI (see 29.1). Note that any Live Setup in the Live Browser can be set as default Live Setup via the Quick Choice Menu Insert set. In addition to this default model "master", you can create additional template sets for different types of projects, each with its unique configuration of tracks, devices, etc. To do this, the current Live Set using the File Save Live Set menu as Templates... command. Any set saved as a model will appear in the browser Templates category and in the Templates folder in the User Library. (Note that the User Library Templates folder is created automatically the first time a model set is saved.) These sets will workElif EHT .)72 Retpahc Ees(Seciived Evil rof xam sa hous selif Fo Sepyt Rehto rof ton ,Selpmas rof Elbaliava ylno notbt tide eht taht eton. ,pilc oidudua ni Desu Selpmas rof .Htagne is hctows tide eht to gnol in enilffo niamer lipmas eht. In general, Live do that can prevent situations such as orphaned live sets (without project), which have the potential to confuse both the user's file management tools and live. However, it cannot control the situations in which the settings or files are moved out of service and disorganized via Explorer (Windows)/Finder (Mac). A note for users of more old live versions: Live does not allow to overwrite the live sets created by the most old main versions to prevent compatibility problems. Instead, you are asked to "skip how ...". In this way, ensure that recently rescuing live sets reside in the project's folders. 5.6.2 Projects and presets by default, new tools and effects are archived in your current project. Sometimes, however, it can have more meaning to save a default on another folder or on your user library, so that you can access it from other projects. It is possible to drag a preset between the folders after saving it (see 19.1.1) or simply drag the bar of the device title on a folder in the Late bar by adding it to the folder. When saving the presets that contain samples in a new position, Live can copy the samples according to the settings in the collection files on the export selector in the bookstore preferences. It is therefore possible to type a new name for the device or confirm the one suggested by Live With Enter. 5.6.3 File management in a file management of a project various convenient tools for project management. Once you have opened a live set that is part of the project button. The file manager will present you an overview of the content and tools of the project for: location of files that lack the project; collect external files in the project (see 5.8); List of files not used in the project (see 5.11); 5.7 Locate missing from their reference positions, the live status bar (located at the bottom of the main screen) will display a warning message.

Clips and slots of instrument samples that refer to missing samples will appear marked "Offline", and Live will play silent instead of missing samples. The Live file manager offers tools for repairing these missing samples will appear marked "Offline", and Live will play silent instead of missing samples. The Live file manager offers tools for repairing these missing samples will appear marked "Offline", and Live will play silent instead of missing samples. clicking the Manage Set button, then clicking the localization button found in the missing files and associated controls. The list of missing files and associated controls. The list of missing file in the browser, drag it to the file manager and release it on the respective row in the missing files list. Note that Live will not bother if the offered file is really the file that was missing. 5.7.2 Automatic Repair Live offers a convenient automatic search function for repairing file references. To send live during a search, click the GO button to search automatic ally. To reveal detailed options to drive the auto search function, click the button in the form of Neighbor. Automatic repair options in the file manager. The research folder defined by the user, as well as any sub-conveniences, in research folder defined by the user, as well as any sub-conveniences, in research folder defined by the user, as well as any sub-conveniences, in research folder defined by the user, as well as any sub-conveniences, in research folder defined by the user.

folder of this Set in the search. Research Library — Includes the Live Library in Research Library in Research Library in Research folder and try again, or locate the sample manually. A candidate found — Live accepts the candidate and considers the problem solved. Several candidates found — Live requires your assistance: Click the Hot-Swap mode. Now you can double-click candidates in the browser to upload them, as the music plays if you like. 5.8 Collect external files To prevent a Live Set from containing broken file references, Live provides the Collection option (i.e. copying) in the Set project folder. This is done through the File menu Click the Managers Choose th Options for collecting external files. Separated by location (other projects, the User Library, installed by Factory Pack, and elsewhere — collections of samples from external units, for example), the File Manager provides: A file count and the associated disk space used; a Show button that lists files in the browser; A Yes/No toggle for the engaging or deactivating collection. Note: Make sure you confirm your choices by clicking the Collect and Save button of the File Manager! The File Manager Collect and Save button. The Collect All and Save button of the File Manager! The Fi azzilitu teS eviL out li es ottuttarpos, aipoc id occas nu erasuac 2Ãup otseuq ehc iton iS. itallatsni ittehccap irtla o eviL id eroC collections! 5.8.1 Collect export files When you save Live manages the copy of the associated files based on the selection made in the file collection on the export selector in the library preferences. This selector provides the following options: Always, the default setting, copy files to the same folder as the clip, preset or track without notification. When asked, Live provides a dialog with the file copy options. It never means that the files will not be copied when you save. 5.9 Aggregated Llocation and Collecting Instead of dealing with problems while you are in a creative mode, you might prefer to set aside some dedicated cleaning time to solve all problems at once. Using File Manager Live, you can find missing files and collect external files not only for the current Live setup, but also for: User Library — Choose the Manager Files command from the File menu: then click the User Library Manager Project — right-click (Win)/CTRL-click (Clips, Live presets — right-click (Vinci) / CTRL-click(Mac) on their browser items and choose the Manager when you're finished. Otherwise your changes will be discarded. 5.10 Find unused files Live File Manager can find unused filesin a project for you. It is therefore possible to review them and decide to eliminate them individually or collectively. When searching for files â € œNon usedâ € œ, live inspection each file in a project folder, checking if it is recalled by any of the in tension or presets of the device device the Project. If not, the file is regarded as unused ¢Ã even if other Projects or programs still use it. To find the unused files for the currently open Project, choose the Manage Files command from the File menu, click the Manage Files command from the list the unused files; there, you can preview samples (see 5.1.4) and delete them if you like. Note you can find the unused files for all Projects found in a specific folder (and its sub-folders): right-click(Win) / CTRL-click(Win) / CTR the files into their respective Projects and then purge the Projects of unused files. 5.11 Packing Projects into Packs Live¢ÃÂÂs File Manager provides the M click on the triangular-shaped fold button next to ¢ÃÂÂPacking.¢Ã Click the Create Pack button to bring up a file-select dialog where you can specify the name and location of a new Pack file. Creating a new Pack firom a Project does not affect the Project. If you want the Project deleted, you can delete it using the browser. Live employs lossless compression techniques to minimize the file size of Packs. Depending on the audio materials in a Project, this saves up to 50 In the file size. To unpack a package (i.e. restore the original live project), double-click the file size of Packs. Depending on the audio materials in a Project, this saves up to 50 In the file size of Packs. management 5.12.1 How can I create a project? A project is created automatically every time you save it in a pre-existing project. 5.12.2 How can I save the presets in my current project? You can save the presets in my current project is created automatically every time you save it in a pre-existing project. into the browser. You can then use file management tools, collect reference samples, etc. 5.12.3 Can I work on multiple versions of a set? If you like to work on different versions of the same project contains multiple live sets, it will only collect a copy of all samples used by the various versions, which can save disk space and help with the organization. 5.2 Where should I save my live sets? You can save live sets wherever you want, but saving for existing project folders can cause problems and should be reserved for special cases. You should save a live set on an existing project only if it is somehow related to the project. 5.12.5 Can I use my folder? You can organize your files in any way you want within a project, but you will need to use the file manager to transfer the files you moved: in the Live browser or through your systemFiles and folders in the project folder. Switch to the project folder in the browser and choose Manage Project through the original fany samples used in the project, the Missing Samples section of the File Manager will indicate it. Click the Locate button to search for samples. Since you know that the samples are all in the Project folder, unfold Automatic Search. Then enable the search is complete, click Collect and Save at the bottom of the File Manager to update the project. Project.
