## Lee deluxe automatic processing press app single stage press kit 90933

Home Contact Privacy Policies Service Agreement EN FR Case ejector system for the LEE Classic turret. (Reverse rotation) Demonstration video below. This system ejects your cases for you, allowing you to leave your right hand on the press lever and your left hand d... from \$39.00 Demonstration video below. This system ejects your cases for you, allowing you to leave your right hand on the press lever and your left hand dedicated to feeding bullets/cases. It speeds up your reloading significantly. As the turret rotates, the rod follower indexes with it, until the 4th operation, then the case/bullet is automatically ejected down the ramp and into the bin. Kit includes: Base plate, reverse rotation rod, rod follower, bin clip, discharge ramp and 2 red bins. The case ejector system is designed for versatility and can be used with or with-out an InLine Fabrication Ultramount press riser. The base plate also includes storage for (3) shell holders. (Only useable if your press is mounted on an Ultramount to provide the clearance underneath for the shellholders.) Also, this system works perfectly with our Quick change system. (Here) Note: I have been asked a couple times if folks can order the system with-out the bins and base bracket, so I have added that as an option. You can select it from the drop down menu above. Also, the 2nd option in the drop down menu offers the complete kit with 2 bin barriers. Note 2: This unit is for the LEE Classic turret press. LEE SKU: 90064 NOT for the LEE Value turret. Please double check your press to be sure you have the LEE Classic Turret. Here is a customers video demo. Price includes priority USPS shipping. (1 to 3 day service) Shown with InLine Fab bin barrier (Optional). Available (Here) data-bread-crumbs=> Case ejector system for the LEE Breech lock Classic Cast, Single Stage The LEE Breech lockClassic cast is a very good single stage unit. This system compliments it nicely by ejecting your cases for you, allowing you to leave your right hand on the press lever and your left hand dedicated to feeding bullets/cases. It speeds up your reloading significantly. Kit includes: Base plate, ejector head, bin clip, discharge ramp and 2 red bins. The case ejector system is designed for versatility and can be installed directly to your bench-top or installed on any InLine Fabrication Ultramount press riser. The base base plate also includes storage holes for (3) shell holders. (Only useable if your press is mounted on an Ultramount to provide the clearance underneath.) Also, this system works perfectly with our Quick change system. (Here) Note: I have been asked a couple times if folks can order the system with-out the bins and base bracket, so I have added that as an option. You can select it from the drop down menu above. Also, the 2nd option in the drop down menu offers the complete kit with 2 bin barriers. Note 2: This unit is for the LEE Breech lock Classic cast . LEE SKU: 90999 (NOT for the LEE Classic cast LEE SKU: 90998 Or the LEE Breechlock Challenger LEE SKU:90588) Any questions, refer to LEE website for reference (Here) Price includes priority USPS shipping. (1 to 3 day service) Shown with InLine Fab bin barriers (Optional). Available as a package in the drop down menu above, or singularly (Here) data-bread-crumbs=> Micro™ Ultramount 4" Ultramount Micro has the same beefy 3\16" thick steel construction as the standard Ultramount, however, the micro is only 4" tall instead of 9 3/4"... \$65.00 Ultramount Micro has the same beefy 3\16" thick steel construction as the standard Ultramount, however, the micro is only 4" tall instead of 9 3/4". Footprint is 9 1/4" wide by 9" deep. Standard Ultramount plates cross over to Ultramount Micro as well, so you can swap top plates if you choose to. (Note) With Ultramount Micro being only 4" tall, most press linkages will hang below the benchtop to impede opening of cabinet doors or drawers (if you have them) below your bench. If you have any doubt, before placing an order, measure the linkages hanging down below your bench top and subtract 4". If you want to have the press completely on top of the bench, the standard Ultramount will fix you up perfectly. Attention: Please choose your particular press application from the drop down box above. Note: If you do not see your press listed here, it is most likely available in quick change style right (Here) Swap out your presses in 30 seconds. Downloadable 4" Micro mount footprint PDF (Here) (You will need 4pcs of 1/4" diameter hardware of whatever style you need to attach the mount to your bench. I would include it, but everyone's benches are different and require different hardware.) (Includes FREE priority USPS shipping within the US. 1-3 day express service) data-bread-crumbs=> Junior™ Ultramount 7 1/2" Ultramount JR has the same beefy 3\16" thick steel construction as the standard Ultramount, however, JR is only 7 1/2" tall instead of 9 3/4". Foo... \$65.00 Ultramount JR has the same beefy 3\16" thick steel construction as the standard Ultramount, however, JR is only 7 1/2" tall instead of 9 3/4". Footprint of the mount is 10 1/2" wide by 9" deep. (Note) With Ultramount JR being only 7 1/2" tall, some press linkages will hang below the benchtop to impede opening of cabinet doors or drawers (if you have them) below your bench. If you have any doubt, before placing an order, measure the linkages hanging down below your bench top and subtract 7 1/2". If you want to have the press completely on top of the bench, the standard Ultramount will fix you up perfectly. (Here) Attention: Please choose your particular press application from the drop down box above. Note: If you do not see your press listed here, it is most likely available in quick change style right (Here) Swap out your presses in 30 seconds. Downloadable 7.5" JR mount footprint PDF (Here) The mount comes with the hardware to assemble the mount and install the press to the mount. (You will need 4pcs of 1/4" diameter hardware of whatever style you need to attach the mount to your bench. I would include it, but everyone's benches are different and require different hardware.) (Includes FREE priority USPS shipping within the US. 1-3 day service) data-bread-crumbs=> Skylight™ LED lighting kit for the LEE Loadmaster The Skylight kit for the LEE Loadmaster features a machined bushing with an embedded high output LED pod that drops into the center hole of the top... \$39.00 The Skylight kit for the LEE Loadmaster features a machined bushing with an embedded high output LED pod that drops into the center hole of the toolhead. Additionally, the system also has a 4" 6 LED strip that attaches to the inside of the press frame. Super bright,high output, out of the way, no heat and does the job perfectly. Average lifespan is 75,000 hours. Few things are more comforting than pure, bright white light, to be able to see everything in motion on your shellplate and verify your powder charge without having to strain your eyes or fight the shadows. These systems are one of the best upgrades you can do to increase your enjoyment and comfort while reloading. The system comes complete with a 110 plug in adapter with 48" long cord, on/off switch, wire routing anchors and zip ties. As with all Inline Fabrication lighting systems, these have our lifetime "no worries" warranty. (Also available with AA battery pack( 8 AA's) instead of 110 wall plug-in if needed.) (Select that option from the drop down menu above) For our international clients, these power transformers are 220v capable, we also have AU and EURO adapters available. Note: You must drill thru the thin aluminum center hole to utilize the Skylight. If you do not wish to do so, the Inline Fab, "Ceiling" 2 LED kit will fix you up nicely. (Includes FREE USPS shipping within the US.) data-bread-crumbs=> 2 LED strip "Ceiling" Kit Complete LED kit with "Ceiling" option. Perfect for the RCBS Pro2000, RCBS Rockchucker, LEE loadmaster, Hornady LNL AP, and many more. This P... \$39.00 Complete LED kit with "Ceiling" option. Perfect for the RCBS Pro2000, RCBS Rockchucker, LEE loadmaster, Hornady LNL AP, and many more. This Patent Pending kit includes, power supply with 48" long cord, on/off switch, "Y" adapter, (1) 4" LED w\quick connect, (1) 2" LED w\quick connect, prep kit and wire routing anchors. This kit is for presses (Like the Hornady Lock N Load and the Dillon 650) that have enough room at "ceiling" to install the 2" light in a downward fashion to flood the shellplate with even more light. Plenty of bright, white light with-out being too much. Not close to an outlet? No worries! AA Battery packs ( 8 AA's) available and can be substituted for 110 power supply at no extra cost. Long battery life. (Select that option from the drop down menu above) (Batteries not included ) For our international clients, these power transformers are 220v capable, we also have AU and EURO adapters available. Installation and wire routing tips (Here) (Includes priority USPS shipping within the US.) data-bread-crumbs=related-batterypackrelated-LED"y"> Images / 1 / 2 / 3 / 4 / 5 Standard LED shellplate lighting kit. Standard LED shellplate lighting kit. Perfect for any "O" frame press, Rockchucker, lyman, LEE, Redding, etc. Also, LEE turret, Redding T-7 and man... \$28.00 Standard LED shellplate lighting kit. Perfect for any "O" frame press, Rockchucker, lyman, LEE, Redding, etc. Also, LEE turret, Redding T-7 and many more. If you have 4" of available space to install it on your press, you are good to go! These Patent Pending hi intensity LED systems put the light right where you need it.....inside the cage of your reloading press. Super thin 6 LED profile attaches to the inside of the upright of your press and floods the shellplate and your cases with light. Double checking powder level before setting each bullet is an important safety step and now becomes easier than ever before. I will let the photos speak for themselves. Each 12 volt light system comes with a 4 inch long, 6 LED strip, inline on/off switch and a 110 wall adapter with 48" long cord. (No more fading\replacing batteries) Also comes with 2 self adhesive wire routing anchors, prep kit and lifetime warranty. The LED strip comes with an aggressive adhesive installed on the back to attach to your press. All you gotta to do is prep the area, clean the area with alcohol, stick it on, plug it in and get to work! Also available with AA battery pack ( 8 AA's) instead of 110 wall plug-in if needed. (Select from drop down menu.) For our international clients, these power transformers are 220v capable, we also have AU and EURO adapters available.
