Phone Clone

Transfer contacts, calendar events, photos,

This is the old phone

This is the new phone

Galaxy S4

By Allen Bethea i Thomas Northcut/Photodisc/Getty Images Some website addresses or URLs are long, bewildering strings of words, abbreviations and random keyboard characters that are difficult to remember. Fortunately, your Android phone's Web browser can remember your favorite websites for you by saving their URLs as bookmarks. If you have a Google account set up already, you can configure your phone to back up your bookmarks and other system information to Google's servers. If you ever have to switch to a new Android phone, Google will automatically transfer your bookmarks as soon as you activate it and sign on. Launch the "Settings" app on your old Android phone. Scroll down to the "Personal" section and tap "Backup & reset." Tap "Back up my data." In addition to bookmarks, your contacts, Wi-Fi passwords and application data will be backed up as well. Set up and activate your new Android Phone. Sign in with your Google Account. Since you already chose "Back up and restore" on your old phone, your bookmarks and other information will be automatically transferred to your new phone. Chrome for Android users can access their phone's bookmarks with Chrome running on their Windows, OSX or Linux PCs by clicking the "Settings" menu, "Bookmarks," and then "Mobile Bookmarks." Android head logo (Image credit: Android Central) Android 10 has been out for more than a year now, and whether you're excited about its new permission settings for apps or the glorious dark mode, there are plenty of reasons to be eager for it to arrive on your phone. Android 11 has already been available for the Pixel lineup since day one. While we are seeing the likes of Samsung and OnePlus devices getting the latest updates, many handsets are still awaiting the update to Android 10. However, as with all Android updates, there's a difference between when Google launches the final build and when the new software actually arrives on your smartphone. We'll be taking a look at all of the major Android phone makers and breakdown when exactly you can expect an Android 10 update for your device. Let's dive a bit deeper and find out which of the best Android phones have been updated to Android 10. Google Pixel Source: Hayato Huseman / Android Central (Image credit: Source: Hayato Huseman / Android Central) Let's start with Google's own phones, the Pixel series. Android 10 has been guaranteed for every existing Pixel device, with the full list being as follows: Pixel 4a Pixel 4 / Pixel 4 XL Pixel 3a / Pixel 3a XL Pixel 3 / Pixel 3 XL Pixel 2 / Pixel 2 XL Pixel / Pixel XL As of September 3, 2019, Android 10 started rolling out for all of these handsets, making them the first batch of phones to be treated to 10's goodness. Samsung Source: Nirave Gondhia / Android Central (Image credit: Source: Nirave Gondhia / Android Central) Samsung is the big player in the Android world, as well as the biggest player in the entire smartphone world. The needle moves a fair bit when Samsung updates a phone. So far, Samsung has issued its Android 10 update to the following devices: Galaxy Note 20 / Note 20 Ultra Galaxy S20 FE Galaxy S20, S20+, and S20 Ultra Samsung Galaxy Z Fold / Z Fold 2 Galaxy Z Flip / Z Flip 5 Galaxy S10, S10+, S10e, and S10 Lite Galaxy S9 and S9+ Galaxy Note 10, Note 10+, and Note 10 Lite Galaxy Note 9 Galaxy M11 Galaxy M51 Galaxy A71 Galaxy A71 5G Galaxy A70/A70s Galaxy A51 Galaxy A50 Galaxy A42 5G Galaxy A31 Galaxy A30s Galaxy A21 / A21 5G Galaxy A20/A20s Galaxy A11 Galaxy A10LG Source: Alex Dobie / Android Central (Image credit: Source: Alex Dobie / Android Central) In recent years, LG has become notorious for slow, inconsistent Android updates. It pains us to say that, but that's the fact. As of right now, LG has updated the following phones to Android 10: LG Wing LG Velvet LG G8LG G8X LG G7 / G7 One LG G7 ThinQ+ LG V60LG V50LG V40LG Q60LG Stylo 5LG K30LG K50LG K50sLG K61LG Q60Huawei Source: Alex Dobie / Android Central (Image credit: Source: Alex Dobie / Android Central) Huawei is one of the world's largest smartphone companies, with its devices ranging from high-end flagships to low-cost budget options. Almost all of the company's current handsets have already been updated to Android 10, including: Huawei P40 series Huawei P30 series Huawei P20 series Huawei Mate 40 Series Huawei Mate 30E Pro 5G Huawei Mate 20 series Huawei Mate 10 series Huawei Mate X / Mate Xs Huawei Y7a Honor 30 / 30 Pro Honor 20 / 20 Pro / 20 Pro Lite Honor 30S Honor 30i Honor 20S Honor View 20 Honor 10X Lite Honor 10 Honor View 10 Honor 9A Honor 9X / 9X Pro Honor 8X Motorola Source: Joe Maring / Android Central (Image credit: Source: Joe Maring / Android Central) Motorola used to be on top of its game when it came to Android updates, but in recent years, the company has gotten slower and more inconsistent with how it handles new software. As of right now, these are all of the Motorola phones that have successfully gotten their Android 10 update: Motorola Edge / Edge+ Moto G 5G Moto G9 Power Moto G8 Plus Moto G8 Play Moto G7 Moto G7 Play Moto G7 Power Moto G7 Plus Moto G Fast Moto Z4 Motorola One / One 5G Motorola One Action Motorola One Fusion+ Motorola One Macro Motorola One Power Motorola One Vision Motorola One Zoom Motorola RAZR / RAZR 5G Moto E (2020) Moto E7 Plus Moto G9 Plus Moto G9 Play Motorola One 5G Ace Moto G Stylus (2021) Moto G Power (2021) Moto G Play (2021) There are a few other phones that we expect to get Android 10 at some point, with those being: Nokia Source: Joe Maring / Android Central (Image credit: Source: Joe Maring / Android Central) When it comes to Android updates, one company that stands out among the rest is Nokia. Led by HMD Global, this current iteration of the Nokia brand has become synonymous with phones that have clean software and get timely, consistent updates. Nokia's been hard at work updating a bunch of its phones to Android 10, with all of the following now running the software: Nokia 8 V 5G UWNokia 9 PureView Nokia 8.3 5G Nokia 8.1 Nokia 8 Sirocco Nokia 7.2 Nokia 7.1 Nokia 7 Plus Nokia 6.2 Nokia 6.1 Nokia 5.3 Nokia 5.1 Plus Nokia 4.2 Nokia 3.4 Nokia 3.2 Nokia 3.1 Plus Nokia 3.1 Nokia 3V Nokia 2.4 Nokia 2.3 Nokia 2.2 Nokia 1 Plus Nokia 1 Nokia 5.1 Nokia 3.1 Nokia 2.1 One Plus Source: Apoorva Bhardwaj / Android Central (Image credit: Source: Apoorva Bhardwaj / Android Central) OnePlus touts fast updates and a fast track to the latest version of Android as a feature of its phones. The company has repeatedly proven that platform updates can be done quickly and fairly bug-free, and that hasn't changed with Android 10. Here are the phones for which Android 10 is now available: OnePlus Nord N10 5G OnePlus Nord N100 OnePlus Nord One Plus 8 / 8 Pro OnePlus 7T / 7T Pro OnePlus 7 One Plus 7 Pro OnePlus 7 Pro 5G OnePlus 6T OnePlus 6 One Plus 5 / 5T Despite being launched with Android Nougat back in 2017, the OnePlus 5 and 5T were updated to Android 10 on May 27th, 2020. Odds & Ends Source: Apoorva Bhardwaj / Android Central (Image credit: Source: Apoorva Bhardwaj / Android Central) Here are the phones that don't quite belong in our categories above but still deserve a shout-out for rocking Android 10: ASUS ZenFone 7 / 7 Pro ASUS ZenFone 6 ASUS ROG Phone 2 / ROG Phone 3 ASUS ZenFone Max Pro (M1) ASUS ZenFone Max M2 Essential Phone Microsoft Surface Duo HTC Desire 21 Pro 5G Sony Xperia 1 Sony Xperia 5 / Xperia 5 II Sony Xperia 10 / 10 Plus Sony Xperia 10 II Sony Xperia XZ3 Sony Xperia XZ2 Sony Xperia XZ2 Compact Sony Xperia XZ2 Premium TCL 20 5G TCL 10 5G UW TCL 10L TCL 10 Plus Xiaomi Mi A2 Xiaomi Redmi Note 8 Xiaomi Redmi 7 Xiaomi Mi 10 Xiaomi Redmi K20 / K20 Pro Poco F1 Poco M2 Pro Poco M3 Poco X2 Poco X3 ZTE Axon 10 Pro (Europe only) ZTE Axon 20 5G Nubia Red Magic 5S Android 10. Everything you need to know! If you are changing smartphones — especially when transferring from one major platform to the other — it's critical to preserve your contacts. Luckily, transferring your contacts to your new device is easy to do. Here, we show you how to move contacts from iOS to Android and back, so you can easily switch back and forth between platforms at will. The best way to accomplish this is via Apple iCloud and Google Contacts in your desktop browser. Let's get started. Oh, and if you're breaking up with Android in favor of iOS, our handy switcher guide gives you the complete lowdown. Export contacts from iCloud If you have enabled iCloud on your iPhone, backing up contacts is easy. Sign in to iCloud on your computer and click Contacts. On the next screen, select All Contacts in the top-left corner and hit Command + A or CTRL + A to select all of them. If you get an alert asking, "Do you want to allow downloads on www.iCloud.com?" click Allow. Click the Gear icon at the bottom of the page and click Export vCard. Once the window opens, select all of your contacts again with Command + A and right-click on any contact. Choose Export vCard, name the vCard, and choose a save location — like your desktop. Your contacts will download to your computer as a VCF file that you can email to yourself or directly import to Google in the browser. Once you activate your new Android phone, set up your email account and import that vCard from your email to upload your contacts. It's a good idea to save the email with the attached vCard. That allows it to serve as a handy backup of all your contacts. You might also save the file somewhere in your system for safekeeping. Transfer with Google Contacts Having a Google account will simplify moving contacts between platforms. If you don't yet have a Google account, sign up for one for free with Google. You will need it for your Android smartphone, regardless. Before you touch your new Android phone, do the following. Log in to Google Contacts in your browser. At the bottom of the left-hand side, you should see an Import option. Click on it, then click Choose File, navigate to the vCard that you saved from iCloud, and click Import. If you already had a Google account, you will notice your contacts list is now larger because of duplicates. If you spot duplicate contacts, spend a few minutes deleting or modifying them. It's good to periodically review your contacts, remove those that you no longer need, and update information. Try to eliminate duplicates manually. Google does offer a "Look for Duplicates" tool designed to do the same thing, but it's not always accurate. Try it out by clicking the Merge & Fix button in the left column of the contacts page, which gives you the option to Merge Duplicates. Transfer contacts to your Android phone When you have your contacts in Google organized exactly how you want them, it's time to put them on your phone. If you haven't powered up your new phone yet, the transfer will be easy. When you first boot up your new phone, it asks if you want to sync your phone to a Google account. Enter your account information, and your phone will automatically import all the contacts from your Google account. If you already turned on your Android phone and didn't sync it with a Google account, do the following. Go to Settings > Accounts or Accounts & Sync to see every account synced with your phone. At the bottom, you will see a button labeled Add Account, where you can enter your Google login. Select your Google account, and it will sync all your contacts to your phone, along with Calendar, Chrome, Gmail, and whatever other components you choose to sync. If you're switching from Android to iPhone, go to Settings > Mail > Add Account > Google. Enter your Google login info, and your iPhone will automatically sync the contacts within your Google account. If you want it to stay synced and include new contacts you add, then go to Settings > Mail > Default Account and select your Gmail account. Use an app If you're in a pinch and need to transfer your contacts quickly, here are two mobile apps designed to make the transfer easy. MCBBackup My Contacts Backup — MCBBackup for short — helps you back up and restore contacts from your phone without using a computer-based or sync method. Back up with a single tap and email yourself a .vcf attachment. The app also features offline backup, easy restore, easy transfer between iOS and Android via email, reminders to back up regularly, and VCF cards. Move to iOS This unusual app is an Apple product built for Android. It connects your Android and Apple device together via Wi-Fi to transfer all your data, though it's limited to iPhones or iPads running iOS 9 or higher and devices with Android 10. It transfers contacts as well as message history, photos and videos, browser bookmarks, mail accounts, and calendars to your new iPhone. Editors' Recommendations
