Segment Addition Postulate

Name _____
Coloring Practice

Use the **Segment Addition Postulate** to answer each question below.
Then, find your *answer* below in the tessellation design and color it. Show your Work!

<p>1) Find AC.</p> <p>AC = 26</p> <p>purple</p>	<p>2) If DE = 8 and DF = 21, what does EF = ?</p> <p>EF = 13</p> <p>yellow</p>	<p>3) If GH = 8 and HJ = 9, what does GJ = ?</p> <p>GJ = 17</p>
<p>4) Points W, Y and Z are collinear with Y in between W and Z. If WY = 9 and WZ = 20, what does YZ = ?</p> <p>YZ = 11</p> <p>orange</p>	<p>5) If LM = x + 3, MN = 2x and LN = 24, what does x = ?</p> <p>x = 6</p> <p>red</p>	<p>6) If PR = 22, what does PQ = ?</p> <p>PQ = 4</p> <p>green</p>
<p>7) If ST = 3x + 8, SU = 24 and TU = 2x - 4, what does ST = ?</p> <p>ST = 12</p> <p>yellow</p>	<p>8) Points A, M and P are collinear with M in between A and P. If AP = 29, AM = 5x - 3 and MP = 8x + 6, what does MP = ?</p> <p>MP = 23</p> <p>purple</p>	<p>9) If KV = 21, what does KO = ?</p> <p>KO = 9</p> <p>green</p>

© 2017 Secondary Math Solutions

Name _____ Date _____

<p>7. AC = _____ (pink)</p>	<p>8. FE = _____ (purple)</p>
<p>9. x = _____ (yellow)</p>	<p>10. x = _____ (green)</p>
<p>11. Points A, B, and C are collinear. Find AC if AB = 16 and BC = 12. AC = _____ (blue)</p>	<p>12. Points A, B, and C are collinear. Point B is between A and C. Solve for x if AC = 2x + 3, AB = -1 + 2x, and BC = 11. x = _____ (black)</p>

Name _____ Score _____
Teacher _____ Date _____

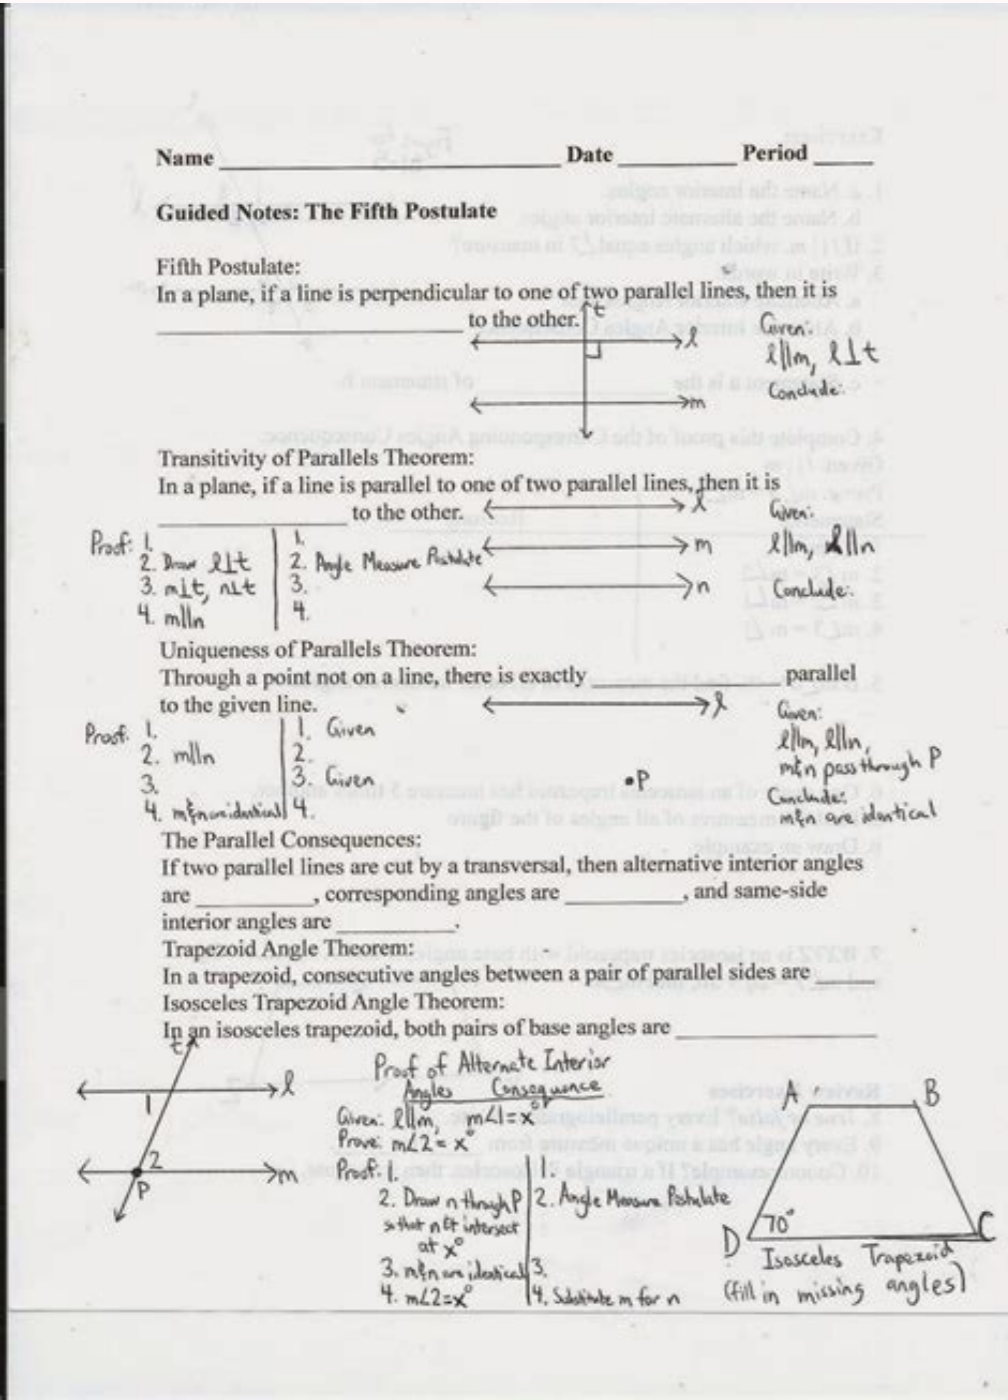

Find the missing alternate angles.

<p>1) $\angle 1 =$ _____ $\angle 2 =$ _____</p>	<p>2) $\angle 3 =$ _____ $\angle 4 =$ _____</p>
<p>3) $\angle 5 =$ _____ $\angle 6 =$ _____</p>	<p>4) $\angle 7 =$ _____ $\angle 8 =$ _____</p>
<p>5) $\angle 9 =$ _____ $\angle 10 =$ _____</p>	<p>6) $\angle 11 =$ _____ $\angle 12 =$ _____</p>

Statement Reason

1) c is midpoint of \overline{BX}	1) Given
2) c is midpoint of \overline{AY}	2) Given
3) $\overline{BC} = \overline{XC}$	3) definition of midpoint
4) $\overline{CA} = \overline{CY}$	4) definition of midpoint
5) $\angle BCA \cong \angle XCY$	5) Vertical angles are congruent
$\triangle BCA \cong \triangle XCY$	by SAS

© mathwarehouse.com

As an additional bonus, the completed spreadsheets make a fabulous decoration of the classroom! With an economy of more than 40% if the activities are purchased separately, this package is a win-win for everyone! Thank you and enjoy your new product! \$ 14.00

Select the overall classification (no classification) Your classification is necessary to reflect your happiness. It's good to leave some feedback. Something went wrong, try again later. This feature has not yet been revised to ensure the quality of our evaluations, only customers who bought this resource can review us to violate our terms and conditions . A free set of 16 task cards. Color motivates even more challenging students and students have a fun chance of practicing their essential geometry skills. All, but 1 includes a rap reference sheet of the teacher. It is especially useful for the year ending, spiral and practical review motivated when students are exhausted from the tests standardized or mentally a € œThe fell before a long pause (ol will see !). Being a military wife, I taught in 8 different schools in the last 11 years in 4 different states! But moving so much exposed me to so many valuable teaching experiences that I would not change it for nothing. I taught all the same 5 à € "12, and almost all subjects conceivable. Experience the free mathway calculator and the problem solver below to practice various typical of mathematics. All task card sets include a log sheet, an intelligent notebook file, a set of numbered cards, a missing or non-mobile student sheet. This No-Prep activity is an excellent resource for subplanes, enrichment / reinforcement, first finishing and extra practice with a little amusement. Mainly, I focused on teaching students with learning, which is one of the motivating factors behind my Ph.D. In Educational Psychology. OItime update 25 April 2018

Best Activity, students apply the postulate of segment addition to find lengths of thread segments while they have fun coloring! The problems are given in line segment format and word format, and include several levels of difficulty (including solving a variable using the segment addition postulate). The postulate of adding an angle indicates that if D is inside "ABC" then "ABD + "CBD = "ABC" The following diagram gives an example of the postulate of adding an angle. In addition, the finished products make fabulous classroom decoration! A bundle is a bundle of resources grouped together to teach a particular topic, or a series of lessons, in one place. With these activities, students will enjoy practicing their geometry skills while having fun creating beautiful and colorful mandalas! These activities are an excellent choice for subplanes, enrichment/reinforcement, first finalizers, and extra practice with a bit of fun. Please send your feedback or questions via our Feedback page. How to use the Postulate of Addition of Angle to find unknown angle measurements. Our customer service team will review your report and get back to you. We appreciate your feedback, comments and questions about this site or page. These engaging activities are especially useful for end-of-year practice, spiral review and motivated practice when students are exhausted from standardized tests or mentally "checked" before a long break! Teachers and students enjoy motivating activities, so engage your students today with these fun activities! The 10 activities include: Polygon angles Triangle and quadrilateral areas Average segment of a triangle Parallel and transverse lines Parallel and transverse properties of parallelograms Segment Additions Postulate Similar polygons Solving straight triangles right triangles Special Colouring is a great of getting your students motivated and interested in and review your geometry skills! In addition, these activities are great for emergency sub-plans, enrichment, anticipated finish, abilities and extra criterion. You should be able to see the first 16 problems of each description comments (0) Shipping and delivery Description Give your students the chance to work on your geometry skills as they have color It's fun! Students will find angles (or variables) absent in this activity and then color their answers in the mandala according to the color indicated to reveal a beautiful and colorful mandala! This NO-PREP activity is an excellent resource for sub plans, enrichment / reinforcement, initial and extra practical finishes with some amusement. MATEMICAL OF MEDICAL TEACHING BASED BASED TO STUDY FOR THE STATEMENT OF REGENTS Realized by Nysed. In addition, the finished products make a fabulous decoration in the classroom! This sample includes: triangular congruence, linear pair, pitature theorem, 90 degree transformation, triangle segment of a triangle, sum quadrupla, sum of triángente isósceles, wheat reasons ; Try the examples provided or enter your own problem and check your response with the explanations step by step. Once students find the missing lengths, they will color your response according to the color given to reveal a beautiful, colorful mandala. How to use angular bisens to find unknown angular measures. Roll the page down to get more examples and solutions. Solutions.
