Ovation guitar serial number guide

A serial number is a unique, identifying number or group of numbers and letters assigned to an individual piece of hardware or software. Other things have serial numbers as well, though, including banknotes and other similar documents. The idea behind serial numbers is to identify a specific item, much like how a fingerprint identifies a specific person. Instead of some names or numbers that specify a whole range of products, a serial number is intended to provide a unique number to one device at a time. Boris SV / Getty Images Hardware serial numbers are embedded in the device, while software or virtual serial numbers are sometimes applied to the user who will be using the software. In other words, a serial number used for software programs are tied to the purchaser, not that specific copy of the program. The term serial number is often shortened to just SN or S/N, especially when the word precedes an actual serial number on something. Serial numbers are also sometimes, but not often, referred to as serial codes. It's important to distinguish serial numbers from other identifying codes or numbers. In short, serial numbers are unique. For example, a model number for a router might be EA2700 but that's true for every single Linksys EA2700 router; the model numbers are identical while each serial number is unique to each particular component. As an example, if Linksys sold 100 EA2700 routers in one day from their website, every one of those devices would have "EA2700" somewhere on them and they would look identical to the naked eye. However, each device, when first built, had serial numbers printed on most of the components that aren't the same as the others bought that day (or any day). UPC Codes are common as well but are actually not unique like serial numbers. UPC Codes are different than serial numbers because UPC Codes aren't unique to each individual piece of hardware or software, as serial numbers are. The ISSN used for magazines and ISBN for books is different as well because they're used for whole issues or periodicals and aren't unique for every instance of the copy. You've probably seen serial numbers many times before. Nearly every piece of the computer has a serial number including your monitor, keyboard, mouse and sometimes even your entire computer system as a whole. Internal computer components like hard drives, optical drives, and motherboards also feature serial numbers. Serial numbers are used by hardware manufacturers to track individual items, usually for quality control. For example, if a piece of hardware is recalled for some reason, customers are usually made aware of which particular devices need service by being provided a range of serial numbers. Serial numbers are also used in non-tech environments like when keeping an inventory of tools borrowed in a lab or shop floor. It's easy to identify which devices need to be returned or which ones have been misplaced because each of them can be identified by their unique serial number. Serial numbers for software programs are usually used to help ensure that the program's installation is only performed one time and only on the purchaser's computer. Once the serial number is used and registered with the manufacturer, any future attempt to use that same serial number can raise a red flag since no two serial numbers (from the same software) are alike. Thanks for letting us know! Tell us why! Future Publishing/Future/Getty Images A Peavey guitar serial number is a unique number that identifies each individual guitar manufactured at the Peavey factory. The serial number usually appears on the back of the headstock of the guitar. Like many factory made products, guitars are issued in series. Because the manufacturer assigns a specific serial number to each instrument in production as it leaves the assembly line, instrument owners or sellers can cross-reference that serial number to its specific year or month of manufacture. Serial numbers are not only helpful in identifying the particular vintage of a specific instrument. They can also assist in the recovery of an instrument when it's lost or stolen. Serial numbers are also helpful for identifying and ordering proper parts should repairs ever become necessary. Although an official and complete listing of Peavey serial numbers is not available on the Internet, Peavey provides a serial number forum on its website, where anyone interested in tracking down the vintage of a specific instrument can submit the serial number and request information from the factory. Peavey began making instruments in 1964 and quickly expanded its production lines to include amplifiers and other musical accessories. The company is now among the leading instrument and electronics manufacturers in the world.
