But it doesn't necessarily install everything, but that was just one thing out of eleven though, which isn't in the play store, to begin with, but it did install other two from the same p ► Foxworth BarlyGood app, but gives me way more than I need. Local files are all I'm interested in but this app gives you so many options for downloading apps you do not need. They could do away with the extra nonsense to make it a 5-star app ► Alshih roanGreat app I use it to install all kinds of stuff!!!! I do suggest to the makers of the app to make apps installable though because it says it's corrupt but other than that it's great. ► Chrisman conif "Good application available" displays when trying to install apps, then just open "APK Installer" Problem solved! Mod Creator for Minecraft allows you to modify Minecraft with little or no coding knowledge necessary. It allows you to create a range of custom content for your game world.This application is designed to allow people with any level of expertise to modify the popular video game, Minecraft. Using this application, you can create custom character skins, mobs, blocks, and items. The custom content you create can be superficial—such as a character skin—or change the way the game plays—such as a custom block with new behaviors.Coding without codingRather than use standard code to create mods, users can take advantage of Mod Creator for Minecraft's visual block-based coding system, which aims to be easy to use regardless of your level of skill with programming. Using this system, the user can create mods that change things like mob behavior, the weather, build mini-games, and more.Mod Creator for Minecraft provides a lot of capability in a system that is user-friendly and easy to pick up. The developers also intend for this app to be a learning aid, acting as a gateway to a wider coding experience, which is why their "Pro" membership gives you access to lots of tutorials. As a Minecraft modding tool, the app does what it sets out to.Should you download it? The app itself is free and is generally well-received by users, so it is worth downloading if you want to mod Minecraft and don't have the expertise to do it with code. If you are not interested in getting into coding, however, you may want to pass on the pro subscription. You will need a Minecraft account to play the game, or you may prefer a different game like Roblox, which also encourages children to get into coding.HighsCan be used to make a wide range of Minecraft modsBlock coding system is ideal for people with no coding experienceLowsDoes not contain all the existing Minecraft content for moddingRequires a pro subscription to access tutorials New Minecraft Skins and Add-Ons Editor!Mod Creator-Made for Minecraft lovers who want to mod their world, this app lets you create and share your own Add-Ons, skins, and mods! This is not an official Minecraft product or associated with Mojang.Tynker is a complete learning system that teaches kids to code. Kids begin experimenting with visual blocks, then progress to JavaScript, Swift, and Python as they design games, build apps, and make incredible projects.Why should kids learn to code?Tynker lets you turn Minecraft time into productive coding time. Computer programming is an important 21st century skill that kids can start learning at any age. While coding with Tynker, kids apply skills such as critical thinking, pattern recognition, focus, problem solving, debugging, resilience, sequencing, spatial visualization, and algorithmic thinking. The Tynker visual language makes it easy for them to learn and apply concepts like conditional logic, repetition, variables, and functions—the same coding concepts used in mainstream programming languages. Apr 21, 2021 Version 4.6.430 We've launched Agent Recall, an exciting new Minecraft coding course where you explore a Minecraft world with hidden secrets that you can unlock with code! So I used to play this on my cousins iPad and now I have my iPad and I got it and because now they have the "Character Creator" tab it won't show up when I join people on X-Box and probably not on any other "X-box-like-Consoles" (Play Station for example) I think it would work if I joined another mobile device since I'm on mobile but it only shows up on my iPad. So it's really fun and I support you guys (and gals) who work for Tynker on this website and app but it is outdated. But, this isn't the end of my review! I actually want to have the same job you people have working for Tynker and I want to make my own App/Website that allows you to have more customization options for Minecraft skins, mobs, and more! This app isn't horrible, trash, garbage, disgusting, dumb, or anything else rude like that! But it isn't like an... ASTONISHING ASTOUNDING app but it is better than good, I think it is just Amazing because I can only imagine how much time it took for all you amazing people working for Tynker to make this app! So I give it a 4/5 because it was amazing, but now it's just super cool. Great Job! This app is great for making custom mobs in Minecraft. There are a few problems, though. Editing shulkers never works because the models get corrupted and the behaviors don't really work. Sometimes, behaviors and models don't work for mobs, especially on older devices. This app is also missing certain mobs, like sheep, strays, phantoms, ravagers, and pillagers. The next complaint that I have is that the app does not allow you to edit the vexes' attack mode. This means that if you make a custom vex model, when the vex attacks its model becomes glitchy. Also, perhaps you could make it so people can't publish projects if they were remixed, because this causes some users to copy other people's creations. People can also use remixing to get around the restrictions. Interestingly, I can mod all of the mobs in the selection without paying on the Tynker website, but not in this app. It would also be nice if you added more complex behaviors for the mobs. Also, why are many of the blocks missing and why are there rubies? Rubies don't even exist in Minecraft! Also also, this app lets you add mobs that are exclusive to the Education Edition to other versions of Minecraft. This is still a fun app, though.EDIT: All of the custom mob models that I made are now broken. Now all of my Minecraft worlds that used the custom mobs look terrible. :(This is the most awesome Add-On creator I have ever downloaded, but there are a few bugs that I might can overcome, and I don't mean to sound trashy, but things need to be fixed. There are a bunch of mobs on Minecraft that aren't editable because they aren't on there. There are items , blocks, and mobs that aren't editable and u don't have to add this, but it would be really cool if you could make tnt editable in which how big of an explosion it is or something can come out of the explosions.But here is everything that needs to be added. Honey block, honeycomb block, honeycomb , bee, dolphin , fox,sweet berries,bee nest,beshive, wandering trader, phantom, grey, white and grey cat etc. (look somewhere on the Minecraft website, but I don't know for sure), vex, vindicator, evoker,Pillager, ravager and I think that is all (again,look on Minecraft website or something). Otherwise, this game is amazing I really like that you added that mythical creatures mini game (some mobs are already in the list of acting as another but they weren't on the editing mob list). I recommend this five stars. I forgot to say strays The developer, Tynker, indicated that the app's privacy practices may include handling of data as described below.
